This is something most of us do not want to happen. HC Ruperelli does not even live here anymore and has decided that a cement company in the heart of Golden Rock within striking distance of a housing project and several neighborhoods, close to a school, a public health facility, a major intersection for free flowing traffic, a strip Mall, and several restaurants and businesses will be a good thing, for him at least. The manufacturing of cement blocks comes with dust pollution, noise pollution, and added traffic of large heavy hauling trucks and flatbeds. This business belongs in an industrial area not in a vibrant community of families and businesses. That hillside is already an eye sore to many if not all and to add to the ugliness of our community is shameful .
