Government of the United States Virgin Islands
Department of Agriculture

INTRODUCTION

Good day, Honorable Senator Javan James, Chair of the Committee on Economic Development and Agriculture, other members present, and all other senators present. We are here to present testimony on behalf of the Virgin Islands Department of Agriculture (VIDA) to the Committee on Economic Development and Agriculture. I am Louis Emanuel Petersen, Jr., Commissioner of the VIDA. Here with me today are Deputy Commissioner Riise Richards, Director of Administration and Management Aaron Bryan, Fiscal Officer Renney Charles, Financial Supervisor Jerrilyn Abraham, Director of the Abattoir Curleen Rogers, Assistant Property Manager Tafari Tzaddi, Acting Marketing Program Director Shantel Douglas, Forest Stewardship Coordinator Mathilde Wilson, Urban and Community Forestry Coordinator Preston Brooks, and Director of the Hemp Program Clifford Joseph. Although not physically present, I would like to acknowledge and express my sincere appreciation to the other hardworking men and women of the Virgin Islands Department of Agriculture, and the farmers throughout the territory.

BACKGROUND

The Virgin Islands Department of Agriculture was created pursuant to Title 3, Chapter 17, Section 291. Act Number 5265 repealed this Section and established the Department of Economic Development and Agriculture and in 1995, Act No. 5265 as amended by Act. No. 6070, abolished the Department of Economic Development and Agriculture and created two separate entities, the Department of Agriculture, and the Department of Tourism.

Government of the United States Virgin Islands

Department of Agriculture

Our mission is to develop, support, and promote an economically lucrative agricultural industry in the U.S. Virgin Islands while supporting farmers, consumers, and the environment. According to 3 VIC SS§ 291, our primary responsibilities include providing basic agricultural services and technical support. We fulfill our mission and responsibilities through our operational divisions, including Food Production, Marketing, Agricultural Development, Abattoir Services, Veterinary Services, Administration and Management, Forestry, Nursery and the Industrial Hemp Program.

DEPARTMENTAL UPDATES AND FY 24 ACCOMPLISHMENTS

ADMINISTRATION

- During FY 24 the VIDA management team participated in meetings with the Office of Collective Bargaining, and the leadership of the OVILU employee's union to advocate for increased salaries and hazardous pay on behalf of our team members. We are hopeful that the negotiated terms will be ultimately approved at the end of the process. To date, lump sum payments have been made to designated employees based on negotiated agreements.
- The VIDA management team played a major role in the activities of the Local Farm and Food Council, the entity responsible for steering the implementation of the USVI Agricultural Plan. The bi-weekly meetings of the council are co-chaired by the UVI President and the Commissioner of Agriculture. The Council membership also includes the Commissioner of the Department of Planning and Natural Resources, the Commissioner of Education, The Director of the Economic Development Authority, farmers, fishermen, and the President of Island Green Living. The hard work of the council has yielded many

Government of the United States Virgin Islands

Department of Agriculture

successes, including the launch of the AgBusiness Centers, the establishment of the grant writing unit at UVI that is dedicated to pursuing grant funding for agricultural development, a UVI based agricultural data collection center, the creation of a logo for use in a local branding campaign, and the issuance of grant awards to farmers and fishermen through a Public Private Partnership Investment Fund initiative. A total of \$500,567 was directly invested in farmers and fishermen to improve operational efficiency and increase farm productivity.

- The administrative team also developed the Conservation Workforce Development Program in partnership with the Vermont White River Natural Resources Conservation District. As a result of this collaboration the VIDA is currently conducting a one-year professional development program to prepare individuals seeking careers in agricultural science and natural resource conservation through education and training in conservation planning, regenerative agriculture, soil health, water quantity and quality, grazing systems, agroforestry, and agricultural engineering. The ultimate goal of this USDA funded innovative workforce development program is to develop certified professionals in the Virgin Islands who will assist USDA in meeting the needs of farmers and land stewards. Presently a group of trainees from the Virgin Islands are in Vermont receiving intense training. The group includes VIDA staff, farmers, and natural resource conservationists.
- Another accomplishment of the administrative division during fiscal year 2024 was the successful search for a suitable candidate to fill the vacancy of Director of Veterinary Services. The new director, Dr. David Wenger, commenced his employment with the VIDA on August 12, 2024. He comes to us with 27 years of experience in the private sector and a passion for working with students on agriculture-based projects.

Government of the United States Virgin Islands
Department of Agriculture

MARKETING

During FY 24, the VIDA Marketing Division executed the following initiatives:

- **WIC Farmers Market Nutrition Program (FMNP)**- This is an on-going, program, funded by USDA FNS, provides access to fresh, locally grown fruits and vegetables to eligible women, infants, and children participating in the WIC program. WIC recipients receive \$5.00 coupons, which they use to purchase locally grown produce from any registered vendor or farmer.
- **Senior Farmers Market Nutrition Program (SFMNP)** – This is another on-going USDA FNS funded program which provides fresh, locally grown fruits, vegetables, honey, and herbs from farmers to low-income seniors in the US Virgin Islands. The Virgin Islands Department of Agriculture Marketing Division procures produce from farmers in bulk to assemble a produce bag containing \$50.00 worth of local farm products.

Both marketing programs benefit the recipients and encourage the consumption of local fruits and vegetables while serving as a financial incentive to farmers. Additional Marketing programs include:

- **Youth Agriculture Development Pilot Program** –The purpose of this project is to teach youth in public housing communities how to access, grow, market, and consume locally grown crops. The Department of Agriculture has partnered with the VI Housing Authority and the St. Croix Science Teacher Association to implement this program on St. Croix. The two housing communities selected for this program are the Candido Guadalupe Housing Community on St. Croix and the Kirwan Terrace Housing Community on St. Thomas. As an added incentive

Government of the United States Virgin Islands

Department of Agriculture

for the youth participants, the crops which they grow will be purchased by the VIDA Marketing Division.

- **Julie Mango in Every Yard Program-** The Virgin Islands Department of Agriculture completed the execution of the ‘Julie Mango in Every Yard Program’ with funding secured from the USDA Agriculture Marketing Services Specialty Crop Block Grant. This initiative aligned with a provision of the VI Code which promotes the Julie Mango as the Fruit of Choice in the U.S. while urging residents to designate a portion of their land for at least one Julie Mango tree. In order to increase the number of Julie Mango trees in the Virgin Islands, the VIDA launched a plant propagation and tree care initiative. A total of 60 participants, territory-wide, received instruction and training on grafting, pruning, and general tree care and maintenance. Due to the high number of requests from the community, the VIDA is preparing to conduct a second series of training on grafting, pruning, and general tree care and maintenance.

UVI SUB GRANT AWARDS – The VIDA Marketing program has also issued several sub grant awards to the UVI School of Agriculture with funding received from the USDA Agriculture Service Specialty Crop Block Grant Program. The awards support a wide range of research projects to investigate intercropping, crop production in protected structures, plant propagation, and multiple vegetable crop production systems.

COOPERATIVE AGRICULTURAL PEST SURVEY (CAPS PROGRAM)

Through a cooperative agreement with the USDA’s Animal and Plant Health Inspection Service, the VIDA receives financial assistance to:

- Establish and disseminate profiles of plant pests of regulatory significance
- Establish and maintain a comprehensive trapping and surveying network using traps and identified survey locations
- Enhance the VIDA's outreach potential and relationship with local farmers through on farm engagements.
- Confirm the presence or absence of specific plant pests that impact the domestic movement of plants and plant products
- Establish early detection protocols for exotic pest infestations or introductions (e.g. Mango Stem Borer)
- Continue to safeguard the economic and environmental stability of the agricultural sector
- Hire one support staff; this position was recently filled, having been vacant for approximately one year.

VETERINARY SERVICES

- Continued collaboration with USDA on Tropical Bont Tick eradication and African Swine Fever surveillance, including 2 weeks of intensive work with the USDA deployment team on all 3 islands
- Participated in discussions coordinated by Senator Carrion with representatives of multiple integral entities to develop an animal population control program
- Participated in discussions with representatives from UVI Dept of Agriculture to establish common goals for agriculture education and outreach programs
- Reestablishing an agricultural animal veterinary service presence with local producers
- Began the onerous process of establishing vendors with the VI government and getting orders placed to replenish supplies that have dwindled in the absence of a director

Government of the United States Virgin Islands
Department of Agriculture

FORESTRY

The Forest Stewardship Program (FSP) - The purpose of this program is to encourage the long-term stewardship of non-industrial private forest lands by assisting the owners of such lands to manage their forest and related resources more actively. We currently have 3 active grants. During fiscal year 2024, the Forest Stewardship Coordinator continued to assist landowners in developing Stewardship Management Plans. In addition, the coordinator engaged in community outreach initiatives across all three islands to educate the public about stewardship and land management opportunities through one-on-one technical assistance.

The FSP received a \$70,000 grant to launch a greenhouse project. This project objective is primarily to grow and distribute a variety of plant species to Virgin Islands residents to help mitigate the damage and destruction of trees caused by Hurricanes Irma and Maria.

Forest Legacy Program (FLP) -- The purpose of the Forest Legacy Administrative funds is to provide support to promote the conservation and protection in perpetuity of important forest areas of high environmental importance that are threatened by conversion to non-forest uses in The US Virgin Islands. Forest Legacy Program seeks to identify and preserve land in a forested state, either by full fee acquisition or by conservation easements. The program currently has 2 active grant programs.

Through the FLP funding has been awarded to purchase 91 acres in the Inner Brass Island located off St Thomas' North Shore. Once the tedious process is completed, this purchase will be the first Virgin Islands Forest Legacy Program purchase of land for St Thomas and the acreage will become

Government of the United States Virgin Islands

Department of Agriculture

a part of the Virgin Islands Territorial Park System. The property is uniquely valued by St Thomas residents for its historic, recreational and fisher use as well as a scenic treasure.

The Urban & Community Forestry (U&CF) Program – The goal of the Urban and Community Forestry Department is to enhance and manage the urban forests of the United States Virgin Islands. This program suffered from instability in leadership for several years. However, a new coordinator was hired during FY 24. The new U&CF Coordinator and his team are currently performing an in-depth comprehensive needs assessment that will respond to the unique needs of the territory while repairing old partnerships and fostering new collaborations.

The team is currently collecting and propagating seeds from native and Heritage trees; the seedlings generated will be sold to the public. The U&CF has received six applications for grant assistance from local nonprofits; these applications are currently being reviewed.

Accomplishments

FOOD PRODUCTION

During the current fiscal year, the Division of Food Production continued to:

- Assist farmers by providing land preparation, water distribution and delivery services, as well as infrastructure repair (i.e. pipelines, pumps, etc.), and by conducting hay baling operations
- Assist other GVI entities by providing support with heavy equipment
- Support numerous youth camps, summer programs, and school-based programs to encourage interest among youth in the field of agriculture

Government of the United States Virgin Islands

Department of Agriculture

- Provide heavy equipment repair support in both districts
- A new service truck was purchased on St. Croix which enhances our capacity to conduct repairs and service heavy equipment in the field
- One new heavy equipment operator was hired, the VIDA is preparing to onboard another new operator in FY 25

INDUSTRIAL HEMP PROGRAM

During FY '24, the VIDA hired a new director for the Industrial Hemp Program who is diligently working to build our newest operational division through research and networking. In addition to the program director, this division has two field inspectors who currently support the VIDA in the capacity of farm property managers. Once the Hemp Program is fully functional, the property managers will also serve as field inspectors for hemp-based enterprises.

Through networking with other hemp operations, the director is working to identify the resources needed for implementing a successful program.

ABATTOIR

A significant amount of time and funding were invested in our aged (approximately 50 years old) Abattoir facility on St. The A new boiler has been procured and installed. The start date for the installation of the boiler is today. Secondly, a new rumping station has also been purchased and installed. Thirdly, the entire rusted steam pipe system was demolished; a replacement network of piping and insulation have been installed. Additionally, extensive roof repair work was completed

Government of the United States Virgin Islands

Department of Agriculture

to address leakage into the workspaces. The final area of work to be completed is in reference to the transfer hoist machinery. Until the replacement hoist arrives on island, we have secured the services of a contractor who is replacing components of the existing hoist. Consequently, the St. Croix abattoir conducted a “soft” reopening two weeks ago. We are pleased to be providing service once again to our clients in both districts who had been adversely impacted for several months.

On St. Thomas our plans include the demolition of the existing abattoir building with future plans to build a modern facility. We have identified a mobile abattoir unit which will be purchased in FY 25.

LEASING PROGRAM

Regarding the leasing program, the VIDA is systematically moving forward on a case-by-case basis. Our first step was to place all clients with leases (or permits) in one of three categories – Good Standing, Poor Standing or Probationary. We are currently in the second phase of the process which involves written and/or in person communication with clients regarding their status and take action as appropriate. Once previously “occupied” acreages become available new applicants will be vetted and lease documents initiated for successful candidates. It should be noted that the VIDA has jurisdiction some acreages that are not legally surveyed; however, only surveyed acreages can be leased. The Department of Property and Procurement has been very supportive with providing some funding for survey work. It should be noted that at this time no insurance company in the territory provides liability insurance coverage (required by the lease agreement) for farmers. Thus, lease documents can be prepared but not executed until we remedy this challenge.

Government of the United States Virgin Islands
Department of Agriculture

FEMA PROJECTS

All FEMA funded projects are moving forward. We are pleased to inform you of the completion of two of these projects:

- Bordeaux Farmers Market repair
- St. John modular temporary office

FY 2024 CHALLENGES

In Estate Dorothea on St. Thomas, the failure of our well pump hampered our ability to distribute water resources to clients for several months. That issue has since been resolved and a new pump was installed.

Another critical challenge faced by the VIDA was the cash flow issue that the GVI is currently facing. This reality has curtailed the procurement of goods and services, adversely impacted the delivery of goods and services to the farming community while negatively impacting the responsiveness of vendors on whom we depend.

Across the divisional units of the VIDA, one of the commonly faced challenges is undoubtedly a shortage of adequate staff to efficiently complete assigned tasks. The VIDA management team is progressively addressing this concern. Within FY 24 one additional staff was hired to work in the plant nursery, a new heavy equipment operator was onboarded, and the abattoir gained an additional staff member. During FY 2025 we will continue to address the issue of staff shortages, based on available funding.

Government of the United States Virgin Islands
Department of Agriculture

LOOKING AHEAD TO OPPORTUNITIES

As we continue to implement our plans for FY 2025, our team looks forward to many successes and partnerships. Among these are the numerous initiatives which will be supported with funds from the American Rescue Plan Act (ARPA) which have been allotted by the Office of the Governor. The proposed projects are designed to address water infrastructural needs, entrepreneurial training in agricultural science for young adults, equipment upgrades and replacements, building repairs, farmers' market improvements, the bulk purchase of water tanks, cooperative business training, and provide grant funding opportunities for farmers. We are working very closely with the Office of Management and Budget and looking forward to finalizing project agreements within the next few weeks. The execution of these agreements will authorize the release of funds for project implementation. Specific examples of these proposed projects include the construction of two cisterns in Estate Bordeaux, the renovation of an abandoned cistern in Estate Dorothea, the water well extension project in the Community Gardens in Estate Lower Love on St. Croix, the Fresh Ministries Aquaponics Center facility upgrade on St. Croix, the launch of the Community Garden Project in Coral Bay on St. John, and the purchase of a mobile abattoir unit for St. Thomas.

We are also very enthused about the on-going collaboration and agreement between the VIDA and the Caribbean Area Office of the USDA Natural Resources Conservation Service to implement the Bordeaux Watershed Improvement Project which will enhance water quantity and quality for farmers. The scope of work includes the renovation and restoration of all sediment ponds to maximize water holding capacity, enhancing water collection and storage through the strategic placement or construction of storage structures, channelling of runoff water, the expansion of the water distribution system, and improved access roads. On October 15, 2024, we will be conducting public meetings to share information regarding the project and receive input from stakeholders. To

Government of the United States Virgin Islands

Department of Agriculture

date more than \$2M of federal funding has been allotted for the project with additional funds to be assigned for the design and construction phases.

In the St. Thomas/St. John District a front-end loader has been purchased and a new water truck with a 2500-gallon tank is scheduled to be delivered on St. Thomas during March 2025. These acquisitions will improve the VIDA's responsiveness to the needs of farmer

Through a Technical Assistance grant awarded by the U.S. Department of Interior the VIDA is actively constructing a pump station which will further enhance the existing water infrastructure in Estate Bordeaux by upgrading pumping capacity, expanding water distribution lines, and reducing the wear on the existing well pumps. This project is approximately 90% complete.

ACKNOWLEDGEMENTS

In closing we extend our appreciation to the members of this committee and the entire 35th Legislature of the Virgin Islands of the United States for your support and the opportunity to share updates from the Department of Agriculture. We also express sincere appreciation to our farming clientele throughout the Virgin Islands for their tireless effort and support. We acknowledge and thank our Honorable Governor and Lieutenant Governor as well as the entire Bryan-Roach administration for their leadership and unwavering support of Virgin Islands Department of Agriculture. Finally, we would like to close by once again acknowledging our hard-working VIDA staff for their support, sacrifices, and tireless efforts and dedication to our community in general and our farmers in particular.
