- 6. PAYMENT PROCESS: Invoices shall be submitted on a timely basis. Invoices shall be organized so that services associated with each construction phase are clearly identified in separate detailed listings of charges. Payment of invoices must be approved by the Authority or its designee after inspection. The Authority will make payments within forty-five (45) days after invoice approval and acceptance of work after the inspections noted in Paragraph(s) 37 and 38.
- (a) INDEMNIFICATION: Should the Contractor, after receipt of payment of invoices by the Authority not timely pay all persons who have fulfilled their obligations to perform labor and/or furnish materials in the prosecution of the work provided for herein, including by way of example workmen, laborers, furnishers of materials, machinery, equipment and fixtures, then Contractor agrees to indemnify the Authority for such payment(s). Pursuant to Paragraph 16(b), Contractor shall obtain an executed lien waiver upon making payments to all persons who have fulfilled their obligation to perform labor and/or furnish materials in the prosecution of the work provided herein.
- 7. WORKMANSHIP/WARRANTY: The Contractor will complete all work in a substantial and workmanlike manner according to standards and practices in the Contractor's trade for the construction work to be performed. The work shall conform to all applicable codes and regulations which apply to the work to be performed whether or not covered by the specifications and drawings for the work. The Contractor warrants that the final product of Contractor's work shall be fit for the purposes for which it is intended. Contractor will warrant against defects in materials and labor for a period of One (1) year from the date of completion and upon acceptance of the work by Homeowner and the Authority.

replace at its own expense damaged or unsuitable materials with the new material of satisfactory quality.

- 9. COMPLETION & EXTENSION OF CONTRACT WORK: The Contract shall be completed on or before the date of completion as set forth in Appendix(s) B, C and D; and the Authority has accepted all work. If the satisfactory execution of the Contract shall require work or materials in substantially greater amounts or quantities than those set forth in the plans or scope of work, then the Contractor shall submit a Request for Information and other supporting documentation which substantiate the additional work, and any associated increase in cost and time, if applicable. All Change Orders shall be in writing and shall be submitted to the Authority for approval. The Change Order shall be fully executed prior to undertaking the additional work. No allowance shall be made for unauthorized delays or suspension of the work.
- 10. ADDITIONAL WORK: The Authority, Homeowner and Contractor understand that Program funds are solely for the work authorized by the Program and described in Appendix(s) B, C and D; and shall not be used for other purposes or improvements on the Property that are not part of the Project. Additional work agreed upon by the Homeowner and Contractor shall not be initiated until after all work identified in the Scope of Work has been completed and passed final inspection.
- 11. MOLD ASSESSMENT AND REMEDIATION: Mold assessment will be performed by general contractors procured through the mini-bid process. A visual inspection is the most important initial step in identifying a possible mold problem and in determining remedial strategies. Visual inspections should also include observations of hidden areas where damages may be present, such as crawl spaces, attics, and behind wallboard to the extent feasible without destructive testing or removal of apparently undamaged building materials. The extent of any water damage and mold growth should be visually assessed and the affected building materials identified.

Areas where mold was, or is, identified as part of the initial site inspection (ISI), the Walk Through or during construction will be required to be remediated by the general contractors. If a visual inspection by the general contractor reveals the presence of mold, photographs should be provided to substantiate the claim and then remediated.

- (a) **REMEDIATION:** Currently there are no governmental standards pertaining to acceptable levels of indoor airborne mold spores and structures. Mold is present everywhere in the environment. For all projects, identified moisture sources should be eliminated prior to further remediation. Post remediation dehumidification may be necessary to dry the remaining structural framing materials prior to any rehabilitation. In cases where this occurs the general contractors will incorporate the cost into the bid proposal. Materials harboring mold are expected to be cleaned or replaced by the general contractor.
- 12. ACCEPTANCE OF PLANS AND CONSENT TO PERFORM THE PROJECT: Contractor hereby acknowledges that it has been presented the Scope of Work ("SOW") for the Project. Contractor has fully reviewed the SOW, which specifies the construction and other activities, including any environmental mitigation as outlined in the Mitigation Measures Report,

13. CONTRACTOR'S REPRESENTATIONS: The Contractor warrants that it is fully informed regarding all the conditions affecting the work to be done and labor and materials to be furnished for the completion of the Contract. Contractor further represents that it is fully equipped, competent, and capable of performing the work and is available to perform such work.

The Contractor warrants that it is eligible to receive contract awards using federally appropriated funds and that it is not suspended or debarred from entering into contracts with any federal agency. The Contractor shall include this provision in each of its subcontracts hereunder, a copy of which shall be provided to the Authority upon execution. In the event the Contractor or sub-contractor misrepresents its eligibility to receive contract awards using federal funds, the Contractor agrees that said contractor or sub-contractor shall not be entitled to any payment for any work performed under this Contract and that it shall require the contractor or sub-contractor to promptly reimburse any progress payments heretofore made.

# CHANGE ORDERS TO CONTRACTS

Change orders are issued when the initial agreed upon pricing or work to be completed requires modification. First, the contractor must complete a Change Order Request Form. This form and supporting documentation must be delivered to the Project Manager for review. Each change order must have a cost analysis. Once the Project Manager approves the change order, it is returned to the contractor for execution. Change orders can only be invoiced once approved by the Executive Director. The amount listed on the invoice must match the previously approved amount and must be cost reasonable. The Project Manager is responsible for verifying cost reasonableness. Verification documentation for cost reasonableness becomes an attachment to the change order.

The six (6) year expenditure period commences with the initial obligation of funds provided under 83 FR 5844. Additionally, per 83 FR 5844, the provisions at 24 C.F.R. § 570.494 and 24 C.F.R. § 570.902, regarding timely distribution and expenditure of funds, are waived and an alternative requirement was established.

Furthermore, consistent with 31 U.S.C §1555 and OMB Circular No. A-11 (2017), if the Secretary of HUD or the President of the United States determines that the purposes for which the appropriation was made have been carried out and no disbursement has been made against the appropriation for two (2) consecutive fiscal years, any remaining unobligated balance shall be canceled and will be made unavailable for obligation or expenditure for any purpose.
