On 9/10/2026 a neighbor, who wished to remain anonymous, called for this same rezoning to complain they oppose any more businesses in residential community changing the character. The entry and exit of this project is obstructing the road and is a hazard due to limited space and low visibility in a busy road where tourist and safari buses have to make a sharp turn. They mentioned that there is already the construction of a 4 car parking and they are concerned it means that the rezoning is a done deal because of this. They also mentioned that the sign for the public hearing went up the previous week and that is too short of notice.
